Sir Arthur Conan Doyle once called “The Adventure of the Speckled Band” his favorite Sherlock Holmes story. Indeed, it is a classic and enduring example of the mystery form. In this activity, students will learn about mystery vocabulary and structure, learn to identify those elements in the story, and craft a persuasive response that predicts their own solution to the mystery.

**LEARNING OBJECTIVES**

- Learn “mystery” vocabulary and identify those elements in “The Adventure of the Speckled Band”
- Cite evidence from the text to support analysis
- Generate a persuasive essay that uses textual elements to support a claim or argument

**TIME REQUIRED**

**PROGRAM FORMAT**

1. **Segment**: On the Trail of a Mystery
   - Make Your Case!
   - Revealing the Solution
2. **Format**: Group Discussion and Activity
   - Individual Writing Activity
   - Video Clip and Discussion
3. **Time**: 30 min

**Notes**: The International Exhibition of Sherlock Holmes ©2013
CCSS.ELA-Literacy.RL.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

CCSS.ELA-Literacy.RL.7.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.

CCSS.ELA-Literacy.RL.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.

CCSS.ELA-Literacy.RL.6.3 Describe how a particular story’s or drama’s plot unfolds in a series of episodes as well as how the characters respond or change as the plot moves toward a resolution.

CCSS.ELA-Literacy.RL.7.3 Analyze how particular elements of a story or drama interact (e.g., how setting shapes the characters or plot).

CCSS.ELA-Literacy.RL.8.3 Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision.

CCSS.ELA-Literacy.W.6.1 Write arguments to support claims with clear reasons and relevant evidence.

ADVANCE PREPARATION

Previous Class:
- The students may read the first section of “The Adventure of the Speckled Band” or, if time permits, the students may read it in class following the discussion of mystery elements.

Notes and Hints:
- The students will read the first three-quarters of the story and write a persuasive paragraph that predicts the story’s solution. The recommended “cut-off” point for Part I is after the sentence: “Then he turned down the lamp, and we were left in darkness.” It is recommended that the instructor omit the last section of the story completely, so the students are not tempted to “spoil” the story for themselves.

- If the students are reading the first section of the story for homework, encourage them not to seek out the rest of the story online or elsewhere. If a student has read the story previously, he or she may choose to posit an “alternate ending” to the story for his or her persuasive response.
Suggested script is shaded. **Important points or questions are in bold.**

*Suggested answers are in italics.*

By now, you are likely familiar with mysteries. Was anyone familiar with Sherlock Holmes before you read this story? You might have seen modern movies or television shows based on Sherlock Holmes. Even if you are not familiar with Sherlock Holmes, maybe you have read the 39 Clues series or *The Westing Game*? Can you name some mysteries?

*Students list books, movies, video or computer games, etc.*

So we are very familiar with mystery as a form, even if we do not realize it. What does a mystery need to have? What are the common ingredients in a mystery?

*Students will likely list clues, a crime, a detective, etc.*

Write down the list on the board as the students generate ideas. Most students will have an intuitive knowledge of a mystery and may provide information that overlaps with the “On the Trail of a Mystery” resource.

1. **On the Trail of a Mystery**

   We have listed many of these terms already, but here we present an overview of how a mystery is usually structured. This structure is not necessarily how *every* mystery is arranged, but many of them follow this formula.

   **Exposition**

   In this section, we meet some of the *characters* (usually the main character, the *detective*), and the *setting* of the story is established. When you think of setting, think about “setting the table.” When you set a table, you lay out everything you need before you sit down to a meal. A story’s setting should provide all the background you need before the action of the story begins. A well-written story will continue developing characters...
and providing rich descriptions and context throughout, but establishing a clear and vivid setting at the beginning is crucial to the reader’s understanding of everything that follows.

Ask the class to consider:
- What kind of information do we need before the “action” of the story begins?
- Do the students prefer a lot of exposition, or do they like when a story gets right to the “action?” What is different about the two reading experiences?

**Rising Action**
The introduction of the central problem or conflict sets off a chain of events and actions that constitute the rising action of the story. The detective might encounter a victim, a witness, or a suspect and discover clues. This series of discoveries and events will build logically and, if the writer is skilled, the reader will feel tension, excitement, and a drive to discover the solution to the mystery.

Ask the class to consider:
- Does the writer need to provide all the clues necessary for the reader to solve the mystery?
- How does a writer create the feeling of tension and excitement in a story?
- What purpose does a red herring serve in the story?

**Climax**
In a mystery, the climax could be the high point of physical action in the story or simply the moment when the detective discovers a pivotal clue. Students may differ in their opinion of what the climax of a story is, but a useful characterization of the term is “the point at which an irrevocable change is made.”

2. Have the students go through their copies of Section I of “The Adventure of the Speckled Band” and identify as many vocabulary terms as possible (for example, the dummy pull, the bowl of milk, and the ventilator can all be identified as clues; Dr. Roylott is a suspect.)

3. The class comes together to share their responses.
We have studied the elements of the mystery, but we still have not covered the most crucial part: the solution! The solution to the crime is usually revealed in the story's resolution.

Resolution
The resolution ties up the loose ends in the story. Often the detective will describe his or her process of deduction, reveal the full solution to the mystery, and prove that a suspect is now, undoubtedly, the perpetrator. Often the fates of the victim and perpetrator are revealed.

Ask the class to consider:
• What do we mean when we say a resolution is “satisfying”? What elements does a resolution need to satisfy us, particularly in a mystery story?

I will reveal Sir Arthur Conan Doyle’s solution to the mystery at the end of class, but for now, I would like to hear your solutions! Consider the clues you have identified in the story. What do you think that they mean? Is Dr. Roylott the murderer? Could someone or something else be responsible?

1. Have the students write a short persuasive response (1-2 paragraphs) predicting the outcome of the story. Encourage the students to utilize mystery vocabulary.

2. If time permits, have the students share their responses and predictions.

1. When the students have finished their responses, play the video clip from “Sherlock Holmes and the Speckled Band” (see the Resources section for more information.) In the clip, Sherlock and Watson encounter the snake and learn the fate of Dr. Roylott. On the train ride home, Holmes describes his process of deduction. If the video is unavailable, read the end of the story aloud to the students.
2. Find out if anyone guessed the solution correctly!

Ask the class to consider:

- Was the solution “guessable”?
- Did Conan Doyle give all the information necessary to solve the case?
- Was the resolution a satisfying one?
- What do the students think about the fate of Dr. Roylott?

**Make Your Case! Part II**

If the students were unable to finish their persuasive paragraphs in class, they may complete them for homework and learn the story’s solution in the next class.

For an additional assignment, have the students write a short persuasive response defending either Dr. Roylott or Sherlock Holmes. Were Holmes’ methods justifiable? Was Dr. Roylott a victim?

**EXTENSIONS**

**THE MANY FACES OF SHERLOCK HOLMES**

**Comparing Characters**

Have the students generate a list of the characteristics of Holmes and Watson. Ask the students to seek out other representations of Holmes and Watson (in other books, movies, TV shows, cartoons, comics, etc.) and compare the characters. How have the characters changed? What has remained the same?

**THE EVOLUTION OF MYSTERY**

**Mystery Form**

Have the students read Edgar Allen Poe’s “The Murders in the Rue Morgue” and a contemporary mystery story of their choosing. How has the form changed? What has remained the same?

**WRITING EXPOSITION**

**Telling vs. Showing**

Ask students to experiment with different ways of writing exposition: through dialogue, emails or letters, descriptive
language, summary, etc. Discuss the distinction between “telling” and “showing.”

**WRITE A MYSTERY**

**Exploring Structure**
Ask the students to write their own short mysteries, employing mystery terms and structure. Or, have the students write a mystery that inverts the structure.
This background information is for teachers. Modify and communicate this information to the students as necessary.

Sherlock Holmes is unquestionably the world’s most famous literary detective, but he was not the first. Sir Arthur Conan Doyle was inspired by Edgar Allan Poe, who created what is widely considered the first modern detective story, “The Murders in the Rue Morgue.” Poe’s story introduces many familiar features of the detective story: a brilliant, eccentric hero, an admiring assistant, a complex crime. Poe’s detective, C. Auguste Dupin, also employs logical, methodical thinking (what Poe referred to as “ratiocination”) to solve the case. Dupin would appear in two other Poe stories, but the first of these, “The Murders in the Rue Morgue,” is notable for its originality and its establishment of what would eventually become detective story tropes.

Conan Doyle, a great admirer of Poe’s, built on this framework. Sherlock Holmes is a champion of logical thought, but also a man of science. Holmes’ firm belief in the problem-solving power of science was typical of the Victorian era, which saw great scientific and technological advancement. Holmes was based on Dr. Joseph Bell, a professor of medicine at Edinburgh University, where Conan Doyle studied. Bell dazzled the students there with his casual observational prowess, a habit Conan Doyle borrowed for Holmes.

Conan Doyle also believed that the reader should be given all the relevant information necessary to understand the solution—there should be no clues that the reader is unaware of or uncanny coincidences. Holmes always reveals the logical process of deduction that led to the mystery’s solution, another use of figurative language that is well-observed in modern detective fiction.

“The Adventure of the Speckled Band”
*The Adventures of Sherlock Holmes*, the collection that this story appears in, is in the public domain and is available in a variety of formats via the Project Gutenberg or Google Books websites. The Edgar Allan Poe story referenced in the Background Information section (“The Murders in the Rue Morgue”) is also available there.

http://www.gutenberg.org/
http://books.google.com/books
Audio recordings of *The Adventures of Sherlock Holmes* and “The Murders in the Rue Morgue” are available via LibriVox.

http://librivox.org/

**The Adventures of Sherlock Holmes Series: “The Speckled Band”**

This 1984 episode of *The Adventures of Sherlock Holmes* TV series stars Jeremy Brett (one of the iconic portrayers of Holmes). The series is available on DVD and the individual episode can be purchased on iTunes and Amazon. A clip of the final scene can be found on YouTube.

**Mystery Timeline**

This Mystery.net article follows the trajectory of the modern mystery story, from Edgar Allan Poe to Hawaii 5-O and beyond. The site is also a rich resource for other information on the mystery form.

http://www.mysterynet.com/timeline/history-of-mystery/
On the Trail of Mystery! Resource

The information we need to "get into" the story. This includes the setting, the time and place in which the story occurs. This is often where we meet the main character, the detective. Other characters in a mystery might include an assistant, a victim, a witness, and a suspect.

After the conflict (the "problem" in the story) is introduced, it triggers a series of events that builds tension and excitement. The detective may discover clues, encounter a red herring, interrogate a suspect's alibi, and discover a motive for the crime.

The most exciting part of the story! Here the detective might confront a suspect or discover the pivotal clue that solves the crime.

The story is wrapped up. The detective will reveal the solution to the crime, and describe the process of deduction that lead to the crime's solution. We may also learn what happened to the other characters involved in the mystery, including the perpetrator.
